

## AD103 ALARM ANNOUNCE SYSTEM

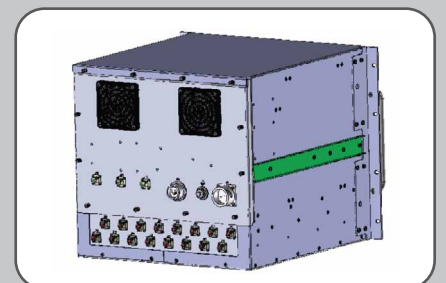

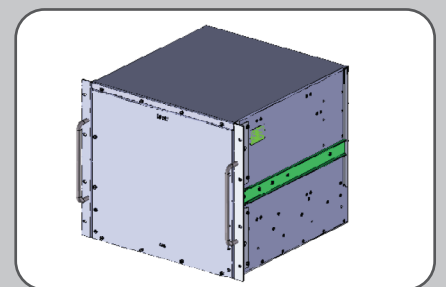

AD103 IS AN ALARM ANNOUNCE SYSTEM THAT PROVIDES LOCAL ANNOUNCE AND LOCAL ALARM THROUGH USER STATION.

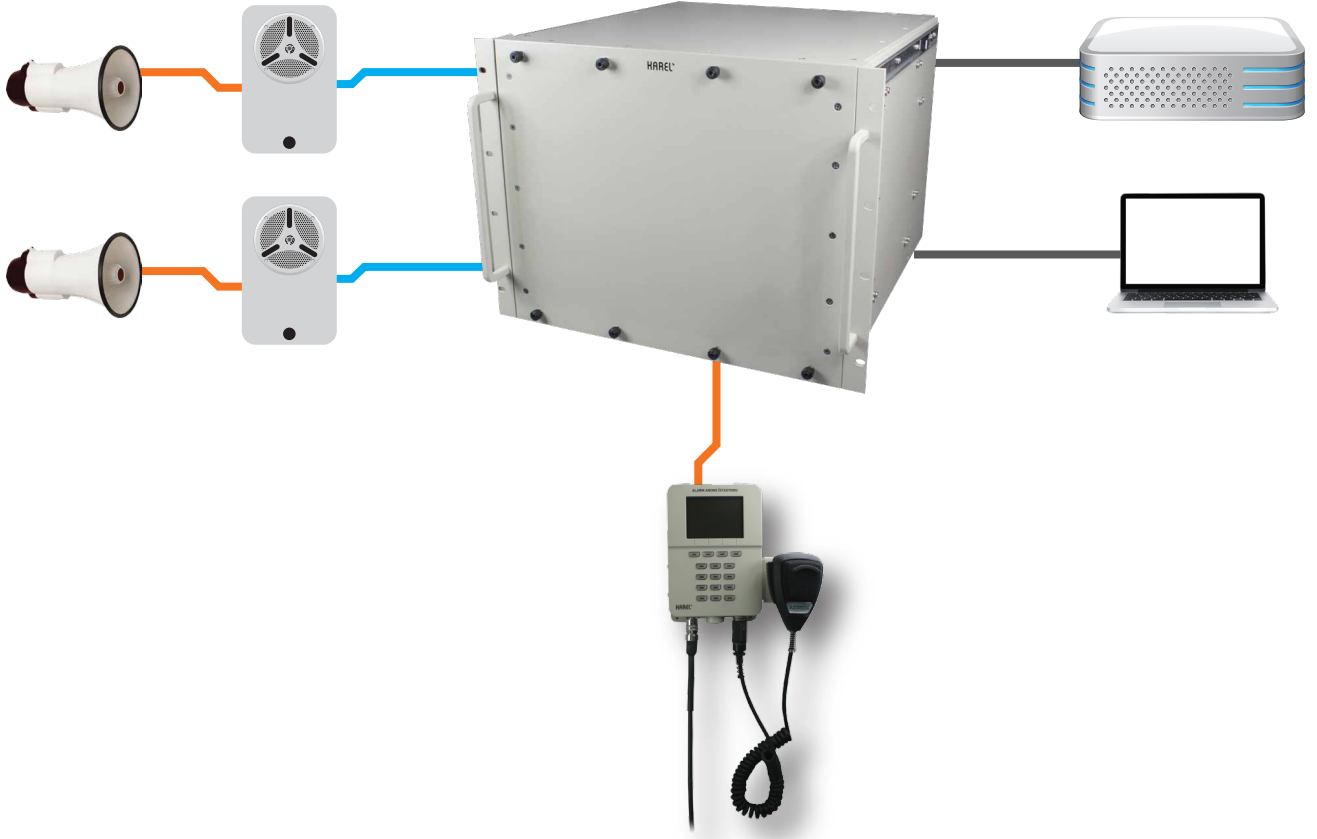

### Basic Features

- 1 General Control Unit
- 1 Alarm Announce Station
- 4 20W Horn Speaker
- 8 8w Speaker
- 1 Power Supply
- Modular structure with 15 slots for interface modules.
- MIL-STD 461E
- MIL-STD 810F
- Operating Temperature -15°C to +45°C
- 500W AC-DC Power Supply Module (Working 220VAC)
- 600W DC-DC Power Supply Module (Working 12-36VDC)

With the management PC software, the whole system can be easily configured and fault conditions can be easily monitored.

It has a structure that ensures making announcements by selecting region within the ship through Alarm Announcement Stations, initiating and stopping certain selected alarms.
